

TARGETING 0% FURNITURE TO LANDFILL.

DEFIT TO REFIT

## Why: connect with us

**Valued Carbon** champions sustainable development through recycling and repurposing. Specializing in eco-conscious office de-fits and demolitions, we salvage reusable furniture and transform waste into resources to reduce landfill.

We deliver quality furniture to charities, communities and start up businesses in need while supporting a circular economy and lowering carbon emissions. With expertise in deconstruction and make-good services, we ensure seamless, safe, and efficient handovers for all our clients.

In Western Australia, Valued Carbon leads the charge, combining local knowledge with national capabilities in our Indigenous-owned Project Net Zero partner to promote sustainability solutions.

## How: are we successful

- **End-to-end service:** Defit to refit is fully managed by our team.
- **Asset management** with disassembly, transport and reassembly of usable furniture conducted by experienced professionals for fast, quiet, and dust-free removal.
- **Material management** with clean at source sorting for ethical recycling practices.
- **Asset Recovery Report** outlining your contribution to the reduction of landfill.
- **Driven** by an identified need in the community and betterment of our environment
